Subject: House Transportation and Infrastructure Committee Staff Briefing on WV Spill

Hello,

Just to keep everyone in the loop, we will be briefing the House Transportation and Infrastructure Committee staff next Tuesday at 11AM on the WV chemical spill. Specifically, they would like us to focus on our authorities and what we have done to date at the site. HQ will participate in person but could the region call-in? (call # TBA)

Our water team lead suggested that R3's John Capacasa would be a great participant to field any water questions that may arise.

Many thanks,

Raquel Snyder
